Priority

An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence of the specification or in an application data sheet (37 CFR 1.78(a)(2) and (a)(5)). The specific reference to any prior nonprovisional application must include the relationship (i.e., continuation, divisional, or continuation-in-part) between the applications except when the reference is to a prior application of a CPA assigned the same application number.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-7 and 9-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-18 of U.S. Patent No. US 6,654,573 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because the currently pending claims claim essentially the same subject matter claimed in the patent. It is noted that currently pending independent Claim 1 is a variation of patent Claims 1 and 8. Further, currently pending Claims 2-7, 9, 11 and 12 are essentially identical to patent Claims 2-7 and 9-11. Furthermore, currently pending Claim 10 is a variation of patent Claim 1 that includes a prior dependent claim from the original application that was incorporated into Claim 1 in the previous application in order to make that claim in that application allowable. It is also noted that currently pending independent Claim 13 is a variation of patent Claims 12 and 8. Further, currently pending Claims 15-20 are essentially identical to patent Claims 13-18. Furthermore, currently pending Claim 14 is a variation of patent Claim 12 that includes a prior dependent claim from the original application that was incorporated into Claim 12 in the previous application in order to make that claim in that application allowable.
